

Before vibe code implementation for C# with Java:

After vibe code implementation for C# with Java :

Feature: Create Lead

Scenario Outline: Successful creation of lead with valid data

Given I open the create lead page

When I type "<companyName>" into the Company Name field

And I type "<firstName>" into the First Name field

And I type "<lastName>" into the Last Name field

And I click the Create Lead button

Then I should see the created lead details

Examples:

companyName	firstName	lastName	
"TCS"	"Rahul"	"Kumar"	
"Infosys"	"Suresh"	"Rao"	
"Wipro"	"Rajesh"	"Sharma"
